

**Shearwater Condominium Association**  
**Landscape Committee**  
**Report to Board – March 16, 2009**

1. Completed since last report:
  - a. Leaf raking and removal.
  - b. Trees were trimmed, either for maintenance purposes or to preserve, to the maximum legal extent, the water view of unit owners.
  - c. Three trees were planted between Units 14 and 15 as legally required remediation for the three trees that were removed last fall. Two of the three trees removed were falling in the water and the third was dead.
2. Upcoming work:
  - a. Mulching will be accomplished the first week of April, weather permitting.
3. We have received additional proposals for the development of a master plan. Following a decision by the Board, we will inventory the property and develop a long term master plan for maintenance, replacement plantings, and new plantings.
