

Shearwater Pool Committee Report

November/December 2018

After the boat shows in October the decking was cleared of the furniture and planters, all of it being stowed safely for the winter months, with Anchor Aquatics completing their winterization of the supply lines mechanicals and pool itself. Their contract for 2019 was forwarded to the Board with the approval of the committee.

Anchor has submitted a proposal for changing out the existing underwater lights to new LED fixtures and bulbs. This proposal will be discussed by the committee in the off season and then forwarded to the Board with a recommendation from the committee. If the committee and the Board feel the expense is justified then the work will commence prior to the opening of the 2019 season.

In January the committee will be conducting a brief online survey of the community as to their likes and dislikes of the facility and what suggestions they may have for improvement. This is in response to the report card issued by the Board, as well as in-person requests by some of our neighbors. The committee is also planning for a meeting in January for those of us who are the most frequent users and therefore the most passionate on the subject of opening hours, etc.
